

Foamaker model VE

The Fomtec foam maker is designed to deliver fully aspirated foam for fire extinguishment directly to the hazard area, using all types of low expansion foam concentrates. Fully aspirated foam provides the most effective performance for all types of foam concentrates, resulting in quick, efficient control of an incident. Fomtec foam makers are in accordance with NFPA Standard 11, and deliver low expansion foam directly onto the fuel surface with a minimum of foam submergence and fuel agitation.

Features

Material body en flanges:	steel (stainless optional)
Water/foam solution inlet:	Stainless 316
Coating:	epoxy RAL 3000 red
Working pressure:	5 - 16 bar
