

### C&C Stand-by chair

C&C Products has developed the C&C stand-by chair for the purpose of unburdening the stand-by diver or wearer of respiratory equipment while waiting. The chair must be adjusted in such a way that, with a straight back, the respiratory equipment rests on a support that is adjustable in height.

The tubular frame of the C&C stand-by chair is entirely constructed of stainless steel, including two aluminium coupling adapters with snap locks for adjusting the seating height and the height of the bottle. To keep the stand-by chair as compact as possible, the seat of the standard version is a bicycle seat.

## Models

### SB-1 BICYCLE SEAT

To keep the chair as compact as possible, this version comes with a bicycle seat.

Dimensions:

### SB-2 PUCH SADDLE

For increasing the seating comfort, this version comes with a Puch saddle.

Dimensions:

### SB-3 PUCH SADDLE + support

Version with extra long support.

An extra long support bar is available for raising the supporting point of the respiratory equipment as high as possible.
